

## FCC Compliance Statement:

<p style="text-align: center;"><b>DECLARATION OF CONFORMITY</b> Per FCC Part 2 Section 2.107(a)</p> <p style="text-align: center;"><b>FC</b></p> <p>Responsible Party Name: G.B.T. INC.</p> <p style="text-align: center;">Address: 18365 Valley Blvd., Suite#A LA Puente, CA 91744</p> <p style="text-align: center;">Phone/Fax No: (818) 854-9338 / (818) 854-9339</p> <p>hereby declares that the product</p> <p style="text-align: center;">Product Name: Mother Board</p> <p style="text-align: center;">Model Number: GA-7ZX</p> <p>Conforms to the following specifications:</p> <p style="text-align: center;">FCC Part 15, Subpart B, Section 15.107(a) and Section 15.109(a), Class B Digital Device.</p> <p><b>Supplementary Information:</b></p> <p style="text-align: center;"><small>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful and (2) this device must accept any interference received, including that may cause undesired operation.</small></p> <p>Representative Person's Name: <u>ERIC LU</u></p> <p>Signature: <u>Eric Lu</u></p> <p>Date: <u>Feb. 9, 2001</u></p>
---

This equipment has been tested and found to comply with limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television equipment reception, which can be

determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Move the equipment away from the receiver
- Plug the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/television technician for additional suggestions

You are cautioned that any change or modifications to the equipment not expressly approve by the party responsible for compliance could void Your authority to operate such equipment.

This device complies with Part 15 of the FCC Rules. Operation is subjected to the following two conditions 1) this device may not cause harmful interference and 2) this device must accept any interference received, including interference that may cause undesired operation.

# Declaration of Conformity

We, Manufacturer/Importer  
(full address)

**G.B.T. Technology Trading GmbH**  
**Ausschlagler Weg 41, 1F, 20537 Hamburg, Germany**

declare that the product  
(description of the apparatus, system, installation to which it refers)

**Mother Board**  
GA-7ZX

is in conformity with  
(reference to the specification under which conformity is declared)  
in accordance with 89/336 EEC-EMC Directive

## How This Manual Is Organized

This manual is divided into the following sections:

<b>1) Revision History</b>	Manual revision information
<b>2) Item Checklist</b>	Product item list
<b>3) Features</b>	Product information & specification
<b>4) Hardware Setup</b>	Instructions on setting up the motherboard
<b>5) Performance &amp; Block Diagram</b>	Product performance & block diagram
<b>6) Suspend to RAM &amp; Dual BIOS</b>	Instructions STR installation & Dual BIOS
<b>7) Four Speaker &amp; SPDIF</b>	Four Speaker & SPDIF introduction
<b>8) @BIOS™ &amp; EasyTuneIII™</b>	@BIOS™ & EasyTuneIII™ introduction
<b>9) BIOS Setup</b>	Instructions on setting up the BIOS software
<b>10) Appendix</b>	General reference

## Item Checklist

- The 7ZX Series motherboard
- Cable for IDE / floppy device
- Diskettes or CD (TUCD) for motherboard driver & utility
- 7ZX Series user's manual

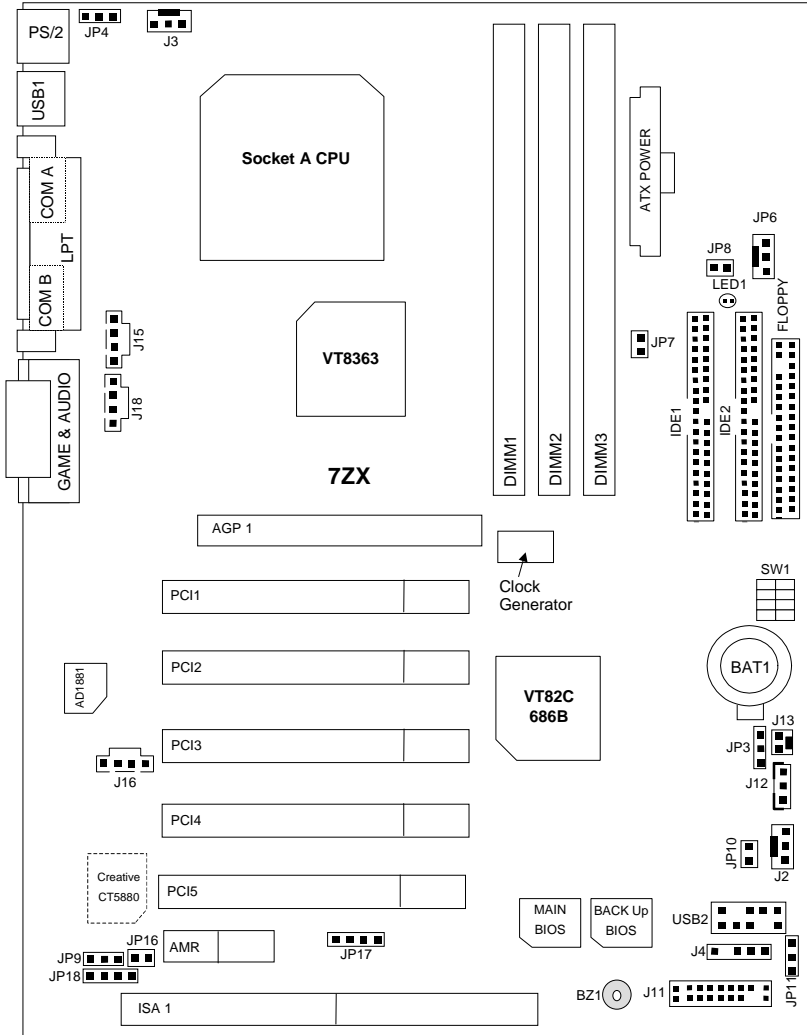

## Summary Of Features

Form Factor	<ul style="list-style-type: none"> <li>• 30.5 cm x 22.8 cm ATX size form factor, 4 layers PCB.</li> </ul>
Motherboard	<ul style="list-style-type: none"> <li>• 7ZX series includes 7ZX, 7ZX-1</li> </ul>
CPU	<ul style="list-style-type: none"> <li>• AMD Athlon™/Duron™ (K7) Socket A Processor</li> <li>• 256K/64K L2 cache on die</li> <li>• Supports 600MHz ~ 1GHz and faster</li> </ul>
Chipset	<p>Apollo KT133, consisting of:</p> <ul style="list-style-type: none"> <li>• VT8363 Memory/AGP/PCI Controller (PAC)</li> <li>• VT82C686B PCI Super-I/O Integrated Peripheral Controller (PSIPC)</li> </ul>
Clock Generator	<ul style="list-style-type: none"> <li>• ICW W230H</li> <li>• ICW W230H</li> </ul> <p>100/102/104/106/108/110/112/133 MHz system bus speeds</p>
Memory	<ul style="list-style-type: none"> <li>• 3 168-pin DIMM sockets</li> <li>• Supports PC-100 / PC-133 SDRAM and VCM SDRAM</li> <li>• Supports up to 1.5GB DRAM</li> <li>• Supports only 3.3V SDRAM DIMM</li> </ul>
I/O Control	<ul style="list-style-type: none"> <li>• VT82C686B</li> </ul>
Slots	<ul style="list-style-type: none"> <li>• 1 AGP slot supports 4X mode &amp; AGP 2.0 compliant</li> <li>• 5 PCI slots supports 33MHz &amp; PCI 2.2 compliant</li> <li>• 1 AMR (Audio Modem Riser) slot</li> <li>• 1 ISA slot (Optional)</li> </ul>
On-Board IDE	<ul style="list-style-type: none"> <li>• Supports PIO mode 3, 4, UDMA 33/ATA 66/ATA 100 IDE &amp; ATAPI CD-ROM</li> <li>• 2 IDE bus master (UDMA 33 / ATA 66 / ATA 100) IDE ports for up to 4 ATAPI devices</li> </ul>
On-Board Peripherals	<ul style="list-style-type: none"> <li>• 1 floppy port supports 2 FDD with 360K, 720K, 1.2M, 1.44M and 2.88M bytes</li> <li>• 1 parallel ports supports Normal/EPP/ECP mode</li> <li>• 2 serial ports (COM A &amp; COM B)</li> <li>• 4 USB ports</li> <li>• 1 IrDA connector for IR</li> </ul>
Hardware Monitor	<ul style="list-style-type: none"> <li>• CPU/System fan revolution detect</li> <li>• CPU/System temperature detect</li> <li>• System voltage detect</li> <li>• CPU overheat shutdown detect</li> </ul>

To be continued...

PS/2 Connector	<ul style="list-style-type: none"> <li>• PS/2® Keyboard interface and PS/2® Mouse interface</li> </ul>
On-Board Sound	<ul style="list-style-type: none"> <li>• Creative CT5880 sound (Optional)</li> <li>• AC'97 CODEC</li> <li>• Line In/Line Out/Mic In/AUX In/CD In/TEL/Game Port /Four Speaker &amp; SPDIF (Optional)</li> </ul>
BIOS	<ul style="list-style-type: none"> <li>• Licensed AMI BIOS, 2M bit flash ROM</li> <li>• Support Dual BIOS (Optional)</li> </ul>
Additional Features	<ul style="list-style-type: none"> <li>• Support Wake-On-LAN (WOL)</li> <li>• Support Internal / External Modem Ring On</li> <li>• Support USB KB/MS Wake up from S3-S5</li> <li>• Includes 3 fan power connectors</li> <li>• Poly fuse for keyboard over-current protection</li> <li>• Support STR (Suspend-To-RAM) function</li> <li>• Support @BIOS™ and EasyTuneIII™</li> </ul>

## CPU Speed Setup

The system bus speed is selectable at 100~133MHz. The user can select the system bus speed by DIP switch SW1.

### Set System Bus Speed

SW1: O : ON, X : OFF

FSB	1	2	3	4
95	O	O	X	X
★100	O	X	X	X
102	O	O	O	X
104	X	X	X	O
106	O	X	X	O
108	O	O	X	O
110	O	X	O	O
112	O	O	O	O
133	O	X	O	X

★ The FSB Speed of the VIA KT133 is 100MHz.

### AMD CPU Heat Sink Installation:

Beware: Please check that the heat sink is in good contact with the CPU before you turn on your system.

**The poor contact will cause over heat, and might cause damage to your processor.**

## Connectors

### Game & Audio Port

Line Out 1: Line Out or SPDIF (The SPDIF output is capable of providing digital audio to external speakers or compressed AC3 data to an external Dolby digital decoder). In general, Line Out 1 is normally Line Out, when it output digital signal, it will be change to SPDIF Out automatically (see page 40 for more information). Line In: In general, Line In is normally Line In. When you select "Four Speaker" in Creative application (see page 37 for more information), Line In will be change to Line Out 2, then you can plug 2 pairs stereo speaker into Line Out 1 and Line In simultaneously.

### COM A / COM B / LPT Port

AMR (Primary)	OFF	3-4	3-4
Onboard AC97+MR (Secondary) (Default)	ON	1-2 3-4	1-2

**JP4: Rear USB Device Wake up Selection (USB Connector → USB1)**

Pin No.	Definition
1-2 Close	Normal (Default)
2-3 Close	USB Device Wake up

(If you want to use "USB Dev Wakeup From S3-S5" function, you have to set the BIOS setting "USB Dev Wakeup From S3-S5" enabled, and the jumper "JP4" enabled.)

\*(Power on the computer and as soon as memory counting starts, press <Del>. You will enter BIOS Setup. Select the item "POWER MANAGEMENT SETUP", then select "USB Dev Wakeup From S3-S5: Enabled". Remember to save the setting by pressing "ESC" and choose the "SAVE & EXIT SETUP" option.)

### JP7: STR Function Enable

Pin No.	Definition
Open	Normal (Default)
Close	STR Enabled

### JP9: Onboard Sound Function Selection (Optional)

Pin No.	Definition
1-2 close	Onboard Sound Enable (Default)
2-3 close	Onboard Sound Disable

JP11: Front USB Device Wake up Selection (USB Port → USB2)

USB2

Pin No.	Definition
1-2 close	Normal (Default)
2-3 close	Enabled Front USB Device Wake up

(If you want to use "USB Dev Wakeup From S3-S5" function, you have to set the BIOS setting "USB Dev Wakeup From S3-S5" enabled, and the jumper "JP11" enabled).  
 \*(Power on the computer and as soon as memory counting starts, press <Del>. You will enter BIOS Setup. Select the item "POWER MANAGEMENT SETUP", then select "USB Dev Wakeup From S3-S5: Enabled". Remember to save the setting by pressing "ESC" and choose the "SAVE & EXIT SETUP" option.)

JP10: BIOS Write Protection (Optional)

Pin No.	Definition
ON	Write Protect Enable
OFF	Write Protect Disable (Default)

⚠ Please Set Jumper JP10 to "OFF" to enabled BIOS Write Function when you update new BIOS or new device

### JP3: Clear CMOS Function (Optional)

Pin No.	Definition
1-2 close	Normal (Default)
2-3 close	Clear CMOS

### BAT1: Battery

#### **CAUTION**

- ☞ Danger of explosion if battery is incorrectly replaced.
- ☞ Replace only with the same or equivalent type recommended by the manufacturer.
- ☞ Dispose of used batteries according to the manufacturer's instructions.

## Performance List

The following performance data list is the testing results of some popular benchmark testing programs.

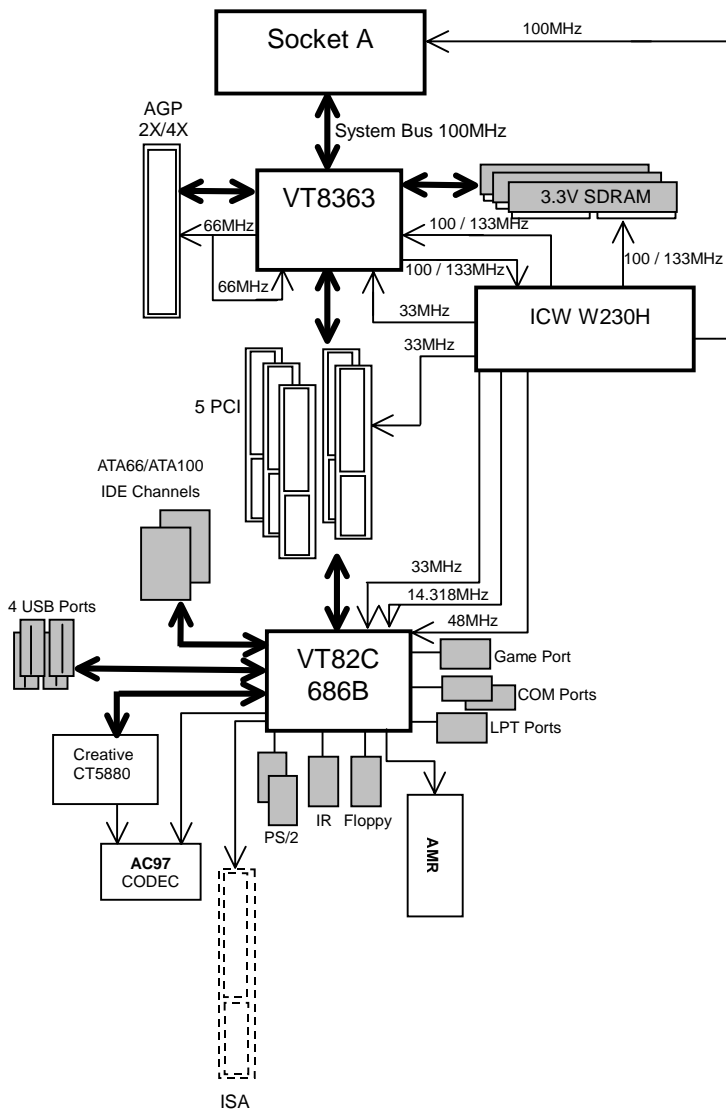

These data are just referred by users, and there is no responsibility for different testing data values gotten by users. (The different Hardware & Software configuration will result in different benchmark testing results.)

- CPU AMD Althon™ 950MHz, AMD Duron™ 700MHz
- DRAM (256x1) MB SDRAM (HYUNDAI HYM71V733201)
- CACHE SIZE 384 KB included in Althon™  
192 KB included in Duron™
- DISPLAY GA-GF2560
- STORAGE Onboard IDE (Quantum KA13600AT)
- O.S. Windows NT™ 4.0 SPK6a
- DRIVER Display Driver at 1024 x 768 65536 colors 75Hz.

Processor	AMD Althon™ 950MHz (100x9.5)	AMD Duron™ 700MHz (100x7)
<b>Winbench99</b>		
CPU mark 99	86.5	61.5
FPU Winmark 99	5210	3840
Business Disk Winmark 99	5410	5440
Hi-End Disk Winmark 99	13600	13200
Business Graphics Winmark 99	481	352
Hi-End Graphics Winmark 99	985	676
<b>Winstone99</b>		
Business Winstone 99	47.3	40.3
Hi-End Winstone 99	50.8	41.6

● If you wish to maximize the performance of your system, please refer to the detail on P.56

# Block Diagram

## Suspend To RAM Installation

### A.1 Introduce STR function:

Suspend-to-RAM (STR) is a Windows 98 ACPI sleep mode function. When recovering from STR (S3) sleep mode, the system is able, in just a few seconds, to retrieve the last “state” of the system before it went to sleep and recover to that state. The “state” is stored in memory (RAM) before the system goes to sleep. During STR sleep mode, your system uses only enough energy to maintain critical information and system functions, primarily the system state and the ability to recognize various “wake up” triggers or signals, respectively.

### A.2 STR function Installation

Please use the following steps to complete the STR function installation.

#### Step-By-Step Setup

##### Step 1:

To utilize the STR function, the system must be in Windows 98 ACPI mode.

Putting Windows 98 into ACPI mode is fairly easy.

#### Setup with Windows 98 CD:

- A. Insert the Windows 98 CD into your CD-ROM drive, select Start, and then Run.
- B. Type (without quotes) “**D:\setup**” in the window provided. Hit the enter key or click OK.
- C. After setup completes, remove the CD, and reboot your system  
(This manual assumes that your CD-ROM device drive letter is D:).

**Step 2:**

(If you want to use STR Function, please set jumper JP7 Closed.)

Pin No.	Definition
Open	Normal (Default)
Close	STR Enabled

**Step 3:**

Power on the computer and as soon as memory counting starts, press <Del>. You will enter BIOS Setup. Select the item **"POWER MANAGEMENT SETUP"**, then select **"ACPI Sleep Type : S3 / STR"**. Remember to save the settings by pressing "ESC" and choose the **"SAVE & EXIT SETUP"** option.

Congratulation! You have completed the installation and now can use the STR function.

### A.3 How to put your system into STR mode?

There are two ways to accomplish this:

1. Choose the "Stand by" item in the "Shut Down Windows" area.
  - A. Press the "Start" button and then select "Shut Down"

- B. Choose the "Stand by" item and press "OK"

## 7ZX Series Motherboard

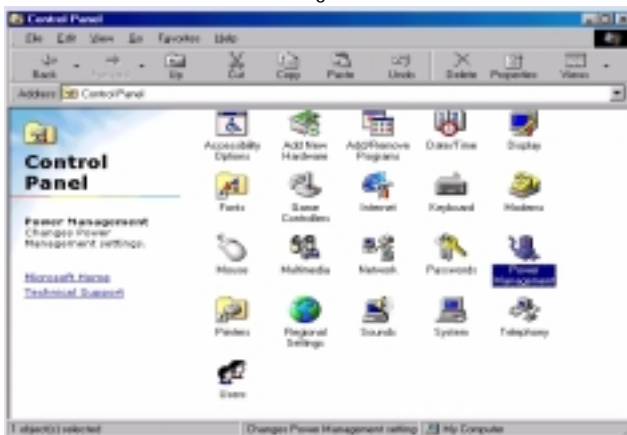

---

2. Define the system "power on" button to initiate STR sleep mode:

A. Double click "My Computer" and then "Control Panel"

B. Double click the " Power Management" item.

C. Select the "Advanced" tab and "Standby" mode in Power Buttons.

D. Restart your computer to complete setup.

Now when you want to enter STR sleep mode, just momentarily press the "Power on" button.

#### A.4 How to recover from the STR sleep mode?

There are five ways to "wake up" the system:

1. Press the "Power On" button.
2. Use the "Resume by Alarm" function.
3. Use the "Modem Ring On" function.
4. Use the "Wake On LAN" function.
5. Use the "USB Device Wake Up" function.

### A.5 Notices:

1. In order for STR to function properly, several hardware and software requirements must be satisfied:
  - A. Your ATX power supply must comply with the ATX 2.01 specification (provide more than 720 mA 5V Stand-By current).
  - B. Your SDRAM must be PC-100 compliant.
2. Jumper JP8 is provided to connect to the STR LED in your system chassis. [Your chassis may not provide this feature.] The STR LED will be illuminated when your system is in STR sleep mode.

STR LED Connector External.

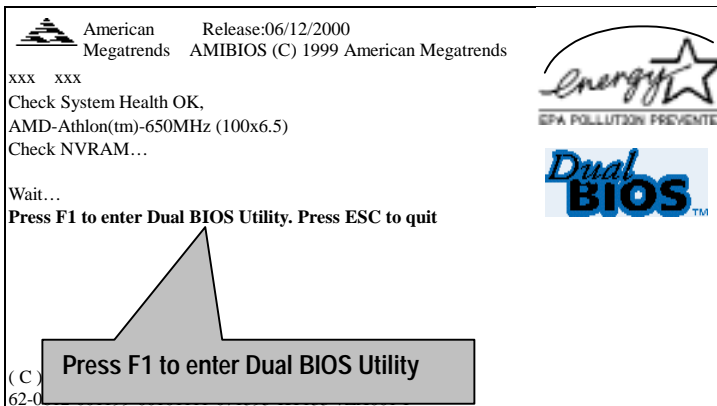

## Dual BIOS Introduction (Optional)

### A. What is Dual BIOS Technology?

Dual BIOS means that there are two system BIOS (ROM) on the motherboard, one is the Main BIOS and the other is Backup BIOS. Under the normal circumstances, the system works on the Main BIOS. If the Main BIOS is corrupted or damaged, the Backup BIOS can take over while the system is powered on. This means that your PC will still be able to run stably as if nothing has happened in your BIOS.

### B. How to use Dual BIOS?

#### a. Boot Screen

b. AMI Dual BIOS Flash ROM Programming Utility

AMI Dual BIOS Flash ROM Programming Utility	
Boot From.....	Main BIOS
Main ROM Type.....	SST 39SF020
Backup ROM Type.....	SST 39SF020
<b>Wide Range Protection</b> Disable	
<b>Boot From</b> Main BIOS	
<b>Auto Recovery</b> Enable	
<b>Halt On Error</b> Disable	
Copy Main ROM Data to Backup	
Load Default Settings	
Save Settings to CMOS	
PgDn/PgUp:Modify    ↑↓:Move    ESC:Reset    F10:Power Off	

c. Dual BIOS Item explanation:

**BIOS will auto detect:**

**Boot From** : Main BIOS

**Main ROM Type** : SST 39SF020

**Backup ROM Type** : SST 39SF020

**Wide Range Protection: Disable(Default), Enable**

*Status 1:*

If any failure (ex. Update ESCD failure, checksum error or reset...) occurs in the Main BIOS , just before the Operating System is loaded and after the power is on, and that the Wide Range Protection is set to "Enable", the PC will boot from Backup BIOS automatically.

*Status 2:*

If the ROM BIOS on peripherals cards(ex. SCSI Cards, LAN Cards,..) emits signals to request restart of the system after the user make any alteration on it, the boot up BIOS will not be changed to the Backup BIOS.

**Boot From : Main BIOS (Default), Backup BIOS**

*Status 1:*

The user can set to boot from main BIOS or Backup BIOS.

**Auto Recovery : Enable(Default), Disable**

When one of the Main BIOS or Backup BIOS occurs checksum failure, the working BIOS will automatically recover the BIOS of checksum failure.

(In the Power Management Setup of the BIOS Setting, if ACPI Suspend Type is set to Suspend to RAM, the Auto Recovery will be set to Enable automatically.)

(If you want to enter the BIOS setting, please press "Del" key when the boot screen appears.)

**Halt On Error : Disable(Default), Enable**

If the BIOS occurs a checksum error or the Main BIOS occurs a WIDE RANGE PROTECTION error and Halt On BIOS Defects set to Enable, the PC will show messages on the boot screen, and the system will pause and wait for the user's instruction.

If Auto Recovery: **Disable**, it will show *<or the other key to continue.>*

If Auto Recovery: **Enable**, it will show *<or the other key to Auto Recover.>*

**Copy Main ROM Data to Backup**

Backup message:

***Are you sure to copy BIOS?***

***[Enter] to continue or [Esc] to abort ...***

The means that the Main BIOS works normally and could automatically recover the Backup BIOS. Or the means that the Backup BIOS works normally and could automatically recover the Main BIOS.

(This auto recovery utility is set by system automatically and can't be changed by user.)

## DualBIOS™ Technology FAQ

GIGABYTE Technology is pleased to introduce DualBIOS technology, a hot spare for your system BIOS. This newness "Value-added" feature, in a long series of innovations from GIGABYTE, is available on GA-7ZX Series motherboard. Future GIGABYTE motherboards will also incorporate this innovation.

### **What's DualBIOS™?**

On GIGABYTE motherboards with DualBIOS there are physically two BIOS chips. For simplicity we'll call one your "Main BIOS" and the other we'll call your "Backup" BIOS (your "hot spare"). If your Main BIOS fails, the Backup BIOS almost automatically takes over on your next system boot. Almost automatically and with virtually zero down time! Whether the problem is a failure in flashing your BIOS or a virus or a catastrophic failure of the Main BIOS chip, the result is the same - the Backup BIOS backs you up, almost automatically.

### **I. Q: What is DualBIOS™ technology?**

#### **Answer:**

DualBIOS technology is a patented technology from Giga-Byte Technology. The concept of this technology is based on the redundancy and fault tolerance theory. DualBIOS™ technology simply means there are two system BIOSes (ROM) integrated onto the motherboard. One is a main BIOS, and the other is a backup BIOS. The mainboard will operate normally with the main BIOS, however, if the main BIOS is corrupt or damaged for various reasons, the backup BIOS will be automatically used when the system powered-On. Your PC will operate as before the main BIOS was damaged, and is completely transparent to the user.

### **II. Q: Why does anyone need a motherboard with DualBIOS™ technology?**

#### **Answer:**

In today's systems there are more and more BIOS failures. The most common reasons are virus attacks, BIOS upgrade failures, and/or deterioration of the BIOS (ROM) chip itself.

1. New computer viruses are being found that attack and destroy the system BIOS. They may corrupt your BIOS code, causing your PC to be unstable or even not boot normally.
2. BIOS data will be corrupted if a power loss/surge occurs, or if a user resets the system, or if the power button is pressed during the process of performing a system BIOS upgrade.
3. If a user mistakenly updates their mainboard with the incorrect BIOS file, then the system may not be able to boot correctly. This may cause the PC system hang in operation or during boot.
4. A flash ROM's life cycle is limited according to electronic characteristics. The modern PC utilizes the Plug and Play BIOS, and is updated regularly. If a user changes peripherals often, there is a slight chance of damage to the flash ROM.

With Giga-Byte Technology's patented DualBIOS™ technology you can reduce the possibility of hangs during system boot up, and/or loss BIOS data due to above reasons. This new technology will eliminate valuable system down time and costly repair bills cause by BIOS failures.

### **III. Q: How does DualBIOS™ technology work?**

#### **Answer:**

1. DualBIOS™ technology provides a wide range of protection during the boot up procedure. It protects your BIOS during system POST, ESCD update, and even all the way to PNP detection/assignment.
2. DualBIOS™ provides automatic recovery for the BIOS. When the first BIOS used during boot up does not complete or if a BIOS checksum error occurs, boot-up is still possible. In the DualBIOS™ utility, the "Auto Recovery" option will guarantee that if either the main BIOS or backup BIOS is corrupted, the DualBIOS™ technology will use the good BIOS and correct the wrong BIOS automatically.
3. DualBIOS™ provides manual recovery for the BIOS. DualBIOS™ technology contains a built-in flash utility, which can flash your system BIOS from backup to main and/or visa versa. There is no need for an OS-dependent flash utility program.
4. DualBIOS™ contains a one-way flash utility. The built-in one-way flash utility will ensure that the corrupt BIOS is not mistaken as the good BIOS during recovery and that the correct BIOS (main vs. backup) will be flashed. This will prevent the good BIOS from being flashed.

### **IV. Q: Who Needs DualBIOS™ technology?**

#### **Answer:**

1. Every user should have DualBIOS™ technology due to the advancement of computer viruses.  
Everyday, there are new BIOS-type viruses discovered that will destroy your system BIOS. Most commercial products on the market do not have solutions to guard against this type of virus intrusion. The DualBIOS™ technology will provide a state-of-the-art solution to protect your PC:  
Case I.) Vicious computer viruses may wipe out your entire system BIOS. With a conventional single system BIOS PC, the PC will not be functional until it is sent for repairs.  
Case II.) If the "Auto Recovery" option is enable in the DualBIOS™ utility, and if a virus corrupts your system BIOS, the backup BIOS will automatically reboot the system and correct the main BIOS.  
Case III.) A user may override booting from the main system BIOS. The DualBIOS™ utility may be entered to manually change the boot sequence to boot from the backup BIOS.

2. During or after a BIOS upgrade, if DualBIOS™ detects that the main BIOS is corrupt, the backup BIOS will take over the boot-up process automatically. Moreover, it will verify the main and backup BIOS checksums when booting-up. DualBIOS™ technology examines the checksum of the main and backup BIOS while the system is powered on to guarantee your BIOS operates properly.
3. Power Users will have the advantage of having two BIOS versions on their mainboard. The benefit is being able to select either version BIOS to suit the performance system needs.
4. Flexibility for high-end desktop PCs and workstation/servers. In the DualBIOS™ utility, the option can be set, "Halt On When BIOS Defects," to be enable to halt your system with a warning message that the main BIOS has been corrupted. Most workstation/servers require constant operation to guarantee services have not been interrupted. In this situation, the "Halt On When BIOS Defects" message may be disable to avoid system pauses during normal booting. Another advantage you gain from Giga-Byte's DualBIOS™ technology is the ability to upgrade from dual 2 Mbit BIOS to dual 4 Mbit BIOS in the future if extra BIOS storage is need.

## Four Speaker & SPDIF Introduction (Optional)

### Four Speaker Introduction

#### A. What is Four Speaker?

The Creative CT5880 audio chip can support up to 4 speaker output. If you select “Four speaker out”, Line In will be reconfigured as another line out to support a second pair of speakers.

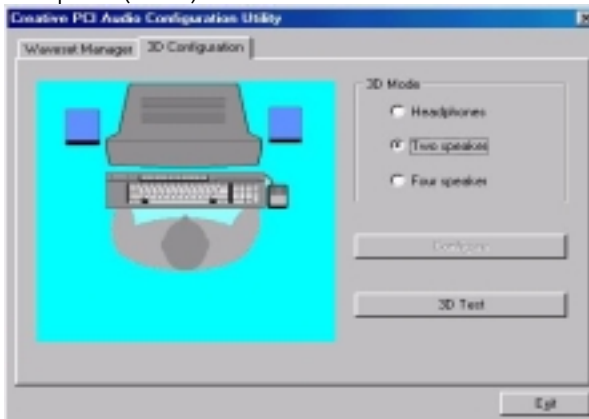

#### B. How to use Four Speaker?

Microsoft Windows 98 Second Edition setup procedure:

- a. Click the audio icon along the task bar and select “Configure 3D Audio”

- b. Select two speaker (Default)

c. Select "Four speaker" item.

Microsoft Windows Me setup procedure:

a. Go to "Control Panel"

b. Select "Audio" Page, and click "Advanced" button.

c. Select "Quadraphonic Speakers" and click ok.

### C. Four Speaker Application

The four speaker function will only be supported in application softwares that use Microsoft DirectX and Creative EAX, for example, the game titles, software DVD player and MP3 player.

## SPDIF Introduction

### A. What is SPDIF?

The SPDIF output is capable of providing digital audio to external speakers or compressed AC3 data to an external Dolby digital decoder.

### B. How to use SPDIF?

- a. Click your mouse right button in "My Computer" and select the "Properties" item.

- b. Click "Device Manager" item.

## 7ZX Series Motherboard

---

- c. Click “Sound, video and game controllers” item and select the “Creative Sound Blaster PCI128” item.

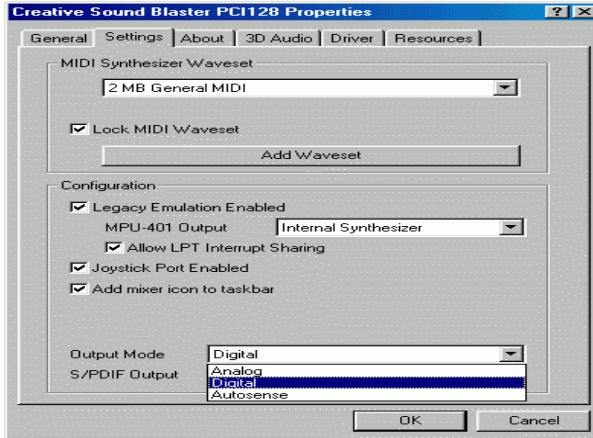

- d. Click “Settings” item and select the “Output Mode” item.

e. Click "Digital" item, Line Out will be reconfigure to SPDIF Out.

※Note: This motherboard doesn't support "Autosense".

## @BIOS™ Introduction

### Gigabyte announces @BIOS™ Windows BIOS live update utility

Have you ever updated BIOS by yourself? Or like many other people, you just know what BIOS is, but always hesitate to update it? Because you think updating newest BIOS is unnecessary and actually you don't know how to update it.

Maybe not like others, you are very experienced in BIOS updating and spend quite a lot of time to do it. But of course you don't like to do it too much. First, download different BIOS from website and then switch the operating system to DOS mode. Secondly, use different flash utility to update BIOS. The above process is not a interesting job. Besides, always be carefully to store the BIOS source code correctly in your disks as if you update the wrong BIOS, it will be a nightmare.

Certainly, you wonder why motherboard vendors could not just do something right to save your time and effort and save you from the lousy BIOS updating work? Here it comes! Now Gigabyte announces @BIOS™ --the first Windows BIOS live update utility. This is a smart BIOS update software. It could help you to download the BIOS from internet and update it. Not like the other BIOS update software, it's a Windows utility. With the help of "@BIOS™", BIOS updating is no more than a click.

Besides, no matter which mainboard you are using, if it's a Gigabyte's product\*, @BIOS™ help you to maintain the BIOS. This utility could detect your correct mainboard model and help you to choose the BIOS accordingly. It then downloads the BIOS from the nearest Gigabyte ftp site automatically. There are several different choices; you could use "Internet Update" to download and update your BIOS directly. Or you may want to keep a backup for your current BIOS, just choose "Save Current BIOS" to save it first. You make a wise choice to use Gigabyte, and @BIOS™ update your BIOS smartly. You are now worry free from updating wrong BIOS, and capable to maintain and manage your BIOS easily. Again, Gigabyte's innovative product erects a milestone in mainboard industries.

For such a wonderful software, how much it costs? Impossible! It's free! Now, if you buy a Gigabyte's motherboard, you could find this amazing software in the attached driver CD. But please remember, connected to internet at first, then you could have a internet BIOS update from your Gigabyte @BIOS™.

## EasyTuneIII™ Introduction

### Gigabyte announces EasyTuneIII™ Windows overdrive utility

“Overdrive” might be one of the most common issues in computer field. But have many users ever tried it? The answer is probably “no”. Because “overdrive” is thought to be very difficult and includes a lot of technical know-how, sometimes “overdrive” is even considered as special skills found only in some enthusiasts.

But as to the experts in “overdrive”, what’s the truth? They may spend quite a lot of time and money to study, try and use many different hardware and software tools to do “overdrive”. And even with these technologies, they still learn that it’s quite a risk because the safety and stability of an “overdrive” system is unknown.

Now everything is different because of a Windows overdrive utility EasyTuneIII™ --announced by Gigabyte. This utility has totally changed the gaming rule of “overdrive”. This is the first overdrive utility suitable for both normal and power users. Users can choose either “Easy Mode” or “Advanced Mode” to run “overdrive” at their convenience. For users who choose “Easy Mode”, they just need to click “Auto Optimize” to have auto and immediate CPU overclocking. This software will then overdrive CPU speed automatically with the result being shown in the control panel. If someone prefers to “overdrive” by oneself, there is also another choice. Click “Advanced Mode” to enjoy “sport drive” class overclocking. In “Advanced Mode”, one can change the system bus speed in small increments to get ultimate system performance. And no matter which mainboard is used, if it’s a Gigabyte’s product\*, EasyTuneIII™ helps to perform the best of system.

Besides, different from other traditional over-clocking methods, EasyTuneIII™ doesn’t require users to change neither BIOS nor hardware switch/ jumper setting; on the other hand, they can do “overdrive” at only one click. Therefore, this is a safer way for “overdrive” as nothing is changed on software or hardware. If user runs EasyTuneIII™ over system’s limitation, the biggest lost is only to restart the computer again and the side effect is then well controlled. Moreover, if one well-performed system speed been tested in EasyTuneIII™, user can “Save” this bus speed and “Load” it in next time. Obviously, Gigabyte EasyTuneIII™ has already turned the “overdrive” technology toward to a newer generation.

## 7ZX Series Motherboard

---

This wonderful software is now free bundled in Gigabyte motherboard attached driver CD. Users may make a test drive of "EasyTuneIII™" to find out more amazing features by themselves.

For further technical information, please link to: <http://www.gigabyte.com.tw>

**※ Note: If your TUCD version is 1.6 or below, please visit our website and download the latest EasyTuneIII™ version.**

## Memory Installation

The motherboard has 3 dual inline memory module (DIMM) sockets. The BIOS will automatically detects memory type and size. To install the memory module, just push it vertically into the DIMM Slot .The DIMM module can only fit in one direction due to the two notch. Memory size can vary between sockets.

Install memory in any combination table:

DIMM	168-pin SDRAM DIMM Modules	
DIMM 1	Supports 16 / 32 / 64 / 128 / 256 / 512 MB	X 1 pcs
DIMM 2	Supports 16 / 32 / 64 / 128 / 256 / 512 MB	X 1 pcs
DIMM 3	Supports 16 / 32 / 64 / 128 / 256 / 512 MB	X 1 pcs

★Total System Memory (Max 1.5GB)

## 7ZX Series Motherboard

Exit Without Saving	P.76

## BIOS Setup

BIOS Setup is an overview of the BIOS Setup Program. The program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

### ENTERING SETUP

Power ON the computer and press <Del> immediately will allow you to enter Setup. If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" bottom on the system case. You may also restart by simultaneously press <Ctrl> – <Alt>– <Del> keys.

### CONTROL KEYS

<↑>	Move to previous item
<↓>	Move to next item
<<←>	Move to the item in the left hand
<→>	Move to the item in the right hand
<Esc>	Main Menu - Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu - Exit current page and return to Main Menu
<+/PgUp>	Increase the numeric value or make changes
<-/PgDn>	Decrease the numeric value or make changes
<F1>	General help, only for Status Page Setup Menu and Option Page Setup Menu
<F2>	Reserved
<F3>	Reserved
<F4>	Reserved
<F5>	Restore the previous CMOS value from CMOS, only for Option Page Setup Menu
<F6>	Load the default CMOS value from BIOS default table, only for Option Page Setup Menu
<F7>	Load the Setup Defaults
<F8>	Reserved
<F9>	Reserved
<F10>	Save all the CMOS changes, only for Main Menu

## GETTING HELP

### Main Menu

The on-line description of the highlighted setup function is displayed at the bottom of the screen.

### Status Page Setup Menu / Option Page Setup Menu

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc>.

## The Main Menu

Once you enter AMI BIOS CMOS Setup Utility, the Main Menu (Figure 1) will appear on the screen. The Main Menu allows you to select from nine setup functions and two exit choices. Use arrow keys to select among the items and press <Enter> to accept or enter the sub-menu.

AMIBIOS SIMPLE SETUP UTILITY-VERSION 1.24a ( C ) 1999 American Megatrends, Inc. All Rights Reserved	
STANDARD CMOS SETUP	INTEGRATED PERIPHERALS
BIOS FEATURES SETUP	HARDWARE MONITOR SETUP
CHIPSET FEATURES SETUP	SUPERVISOR PASSWORD
POWER MANAGEMENT SETUP	USER PASSWORD
PNP/PCI CONFIGURATION	IDE HDD AUTO DETECTION
LOAD BIOS DEFAULTS	SAVE & EXIT SETUP
LOAD SETUP DEFAULTS	EXIT WITHOUT SAVING
ESC : Quit      ↑↓←→ : Select Item      (Shift) F2 : Change Color      F5 : Old Values F6 : Load BIOS Defaults      F7: Load Setup Defaults      F10: Save & Exit	
Time, Date, Hard Disk Type, ...	

Figure 1: Main Menu

- **Standard CMOS Setup**

This setup page includes all the items in standard compatible BIOS.

- **BIOS Features Setup**

This setup page includes all the items of AMI special enhanced features.

- **Chipset Features Setup**

This setup page includes all the items of chipset special features.

- **Power Management Setup**

This setup page includes all the items of Green function features.

- **PNP/PCI Configurations**

This setup page includes all the configurations of PCI & PnP ISA resources.

- **Load BIOS Defaults**

Bios Defaults indicates the value of the system parameter which the system would be in the safe configuration.

- **Load Setup Defaults**

Setup Defaults indicates the value of the system parameter which the system would be in the most appropriate configuration.

- **Integrated Peripherals**

This setup page includes all onboard peripherals.

- **Hardware Monitor Setup**

This setup page is auto detect fan and temperature status.

- **Supervisor password**

Change, set, or disable password. It allows you to limit access to the system and Setup, or just to Setup.

- **User password**

Change, set, or disable password. It allows you to limit access to the system.

- **IDE HDD auto detection**

Automatically configure hard disk parameters.

- **Save & Exit Setup**

Save CMOS value settings to CMOS and exit setup.

- **Exit Without Saving**

Abandon all CMOS value changes and exit setup.

## Standard CMOS Setup

The items in Standard CMOS Features Menu (Figure 2) are divided into 9 categories. Each category includes no, one or more than one setup items. Use the arrows to highlight the item and then use the <PgUp> or <PgDn> keys to select the value you want in each item.

AMIBIOS SETUP – STANDARD CMOS SETUP ( C ) 1999 American Megatrends, Inc. All Rights Reserved	
Date (mm/dd/yyyy) : Wed Jan 17, 2001 Time (hh/mm/ss) : 10:36:24	
	TYPE    SIZE    CYLS    HEAD    PRECOMP    LANDZ    SECTOR    MODE
Pri Master    :    Auto	
Pri Slave     :    Auto	
Sec Master    :    Auto	
Sec Slave     :    Auto	
Floppy Drive A: 1.44 MB 3 ½	Base Memory : 640 Kb
Floppy Drive B: Not Installed	Other Memory: 384 Kb
	Extended Memory: 127Mb
Boot Sector Virus Protection : Disabled	Total Memory: 128Mb
Month:    Jan – Dec	ESC : Exit
Day:      01 – 31	↑↓ : Select Item
Year:     1990–2099	PU/PD/+/- : Modify
	(Shift)F2 : Color

Figure 2: Standard CMOS Setup

- **Date**

The date format is <Week> <Month> <Day>, <Year>.

Week	The week, from Sun to Sat, determined by the BIOS and is display-only
Month	The month, Jan. Through Dec.
Day	The day, from 1 to 31 (or the maximum allowed in the month)
Year	The year, from 1990 through 2099

- **Time**

The times format in <hour> <minute> <second>. The time is calculated base on the 24-hour military-time clock. For example, 1 p.m. is 13:00:00.

- **Primary Master, Slave / Secondary Master, Slave**

The category identifies the types of hard disk from drive C to F that has been installed in the computer. There are two types: auto type, and user definable type. User type is user-definable; Auto type which will automatically detect HDD type.

Note that the specifications of your drive must match with the drive table. The hard disk will not work properly if you enter improper information for this category.

If you select User Type, related information will be asked to enter to the following items. Enter the information directly from the keyboard and press <Enter>. Such information should be provided in the documentation form your hard disk vendor or the system manufacturer.

CYLS.	Number of cylinders
HEADS	number of heads
PRECOMP	write precomp
LANDZONE	Landing zone
SECTORS	number of sectors

If a hard disk has not been installed select NONE and press <Enter>.

- **Floppy Drive A / Drive B**

The category identifies the types of floppy disk drive A or drive B that has been installed in the computer.

None	No floppy drive installed
360K, 5.25 in.	5.25 inch PC-type standard drive; 360K byte capacity.
1.2M, 5.25 in.	5.25 inch AT-type high-density drive; 1.2M byte capacity (3.5 inch when 3 Mode is Enable).
720K, 3.5 in.	3.5 inch double-sided drive; 720K byte capacity
1.44M, 3.5 in.	3.5 inch double-sided drive; 1.44M byte capacity.
2.88M, 3.5 in.	3.5 inch double-sided drive; 2.88M byte capacity.

- **Boot Sector Virus Protection**

If it is set to enable, the category will flash on the screen when there is any attempt to write to the boot sector or partition table of the hard disk drive. The system will halt and the following error message will appear in the mean time. You can run anti-virus program to locate the problem.

Enabled	Activate automatically when the system boots up causing a warning message to appear when anything attempts to access the boot sector or hard disk partition table
Disabled	No warning message to appear when anything attempts to access the boot sector or hard disk partition table. <b>(Default Value)</b>

- **Memory**

The category is display-only which is determined by POST (Power On Self Test) of the BIOS.

**Base Memory**

The POST of the BIOS will determine the amount of base (or conventional) memory installed in the system.

The value of the base memory is typically 512 K for systems with 512 K memory installed on the motherboard, or 640 K for systems with 640 K or more memory installed on the motherboard.

**Extended Memory**

The BIOS determines how much extended memory is present during the POST.

This is the amount of memory located above 1 MB in the CPU's memory address map.

**Other Memory**

This refers to the memory located in the 640 K to 1024 K address space. This is memory that can be used for different applications.

DOS uses this area to load device drivers to keep as much base memory free for application programs. Most use for this area is Shadow RAM.

## BIOS Features Setup

AMIBIOS SETUP – BIOS FEATURES SETUP	
( C ) 1999 American Megatrends, Inc. All Rights Reserved	
1st Boot Device	Floppy
2nd Boot Device	IDE-0
3rd Boot Device	CDROM
S.M.A.R.T. for Hard Disks	Disabled
BootUp Num-Lock	On
Floppy Drive Seek	Enabled
Password Check	Setup
ESC : Quit                      ↑↓→← : Select Item F1 : Help                        PU/PD+/- : Modify F5 :Old Values                (Shift)F2:Color F6 : Load BIOS Defaults F7 : Load SETUP Defaults	

Figure 3: BIOS Features Setup

- 1st / 2nd / 3rd Boot Device

Floppy	Boot Device by Floppy.
ZIP A: / LS-120	Boot Device by ZIP A: / LS-120.
CDROM	Boot Device by CDROM.
SCSI	Boot Device by SCSI.
NETWORK	Boot Device by NETWORK.
IDE-0-IDE-3	Boot Device by IDE-0-IDE-3.
Disabled	Boot Device by Disabled.
USB FDD	Boot Device by USB FDD.
ATAPI ZIP C:	Boot Device by ATAPI ZIP C:.

- **S.M.A.R.T. for Hard Disks**

Enabled	Enable S.M.A.R.T. Hard for Disks.
Disabled	Disable S.M.A.R.T. Hard for Disks. <b>(Default Value)</b>

- **Boot Up Num-Lock**

On	Keypad is number keys. <b>(Default Value)</b>
Off	Keypad is arrow keys.

- **Floppy Drive Seek**

During POST, BIOS will determine if the floppy disk drive installed is 40 or 80 tracks. 360 type is 40 tracks while 720 , 1.2 and 1.44 are all 80 tracks.

Enabled	BIOS searches for floppy disk drive to determine if it is 40 or 80 tracks. Note that BIOS can not tell from 720, 1.2 or 1.44 drive type as they are all 80 tracks. <b>(Default Value)</b>
Disabled	BIOS will not search for the type of floppy disk drive by track number. Note that there will not be any warning message if the drive installed is 360.

- **Password Check**

Setup	Set Password Check to Setup. <b>(Default Value)</b>
Always	Set Password Check to Always.

## Chipset Features Setup

AMIBIOS SETUP – CHIPSET FEATURES SETUP

Figure 4: Chipset Features Setup

- **Top Performance**

If you wish to maximize the performance of your system, set "Top Performance" as "Enabled".

Disabled	Top Performance Disable. <b>(Default Value)</b>
Enabled	Top Performance Enable.

- **DRAM Frequency**

Auto	Set DRAM Frequency to Auto.
100MHz	Set DRAM Frequency to 100MHz. <b>(Default Value)</b>
133MHz	Set DRAM Frequency to 133MHz.

- **SDRAM CAS# Latency**

2	For Fastest SDRAM DIMM module.
3	For Slower SDRAM DIMM module. <b>(Default Value)</b>
Auto	Detect SDRAM CAS# Latency by SPD.

- **AGP Fast Write**

Enabled	Enable this function only if the AGP Card support Fast Write Function. (Enable this function can increase AGP performance).
Disabled	Disable this function. <b>(Default Value)</b>

- **AGP Mode**

4X	Set AGP Mode to 4X. <b>(Default Value)</b>
1X	Set AGP Mode to 1X.
2X	Set AGP Mode to 2X.

- **AGP Comp. Driving**

Auto	Set AGP Comp. Driving to Auto. <b>(Default Value)</b>
Manual	Set AGP Comp. Driving to Manual.

If AGP Comp. Driving is Manual.

Manual AGP Comp. Driving:	00~FF
---------------------------	-------

- **AGP Aperture Size**

4MB	Set AGP Aperture Size to 4MB.
8MB	Set AGP Aperture Size to 8 MB.
16MB	Set AGP Aperture Size to 16 MB.
32MB	Set AGP Aperture Size to 32 MB.
64MB	Set AGP Aperture Size to 64 MB. <b>(Default Value)</b>
128MB	Set AGP Aperture Size to 128 MB.
256MB	Set AGP Aperture Size to 256 MB.

- **PCI Delay Transaction**

Enabled	Enable Delay Transaction. <b>(Default Value)</b>
Disabled	Disable Delay Transaction.

- **USB Controller**

Enabled	Enable USB Controller. <b>(Default Value)</b>
Disabled	Disable USB Controller.

- **USB Legacy Support**

Keyboard/FDD	Set USB Legacy Support Keyboard / Floppy.
KB/Mouse/FDD	Set USB Legacy Support Keyboard / Mouse / Floppy.
Disabled	Disable USB Legacy Support Function. <b>(Default Value)</b>

- **BIOS Flash Protection**

Enabled	BIOS Flash Write Protection.
Disabled	Normal. <b>(Default Value)</b>

- **DRAM Drive Strength**

Auto	Set DRAM Drive Strength Auto. <b>(Default Value)</b>
Manual	Set DRAM Drive Strength Manual.

If DRAM Drive Strength is Manual, then you can adjust item below.

- **MD Bus Strength**

High	Set MD Bus Strength High. <b>(Default Value)</b>
Low	Set MD Bus Strength Low.

- **CAS Bus Strength**

High	Set CAS Bus Strength High. <b>(Default Value)</b>
Low	Set CAS Bus Strength Low.

- **Delay DRAM Read Latch**

1.0ns	Set DRAM Read Latch Delay 1.0ns. <b>(Default Value)</b>
1.5ns	Set DRAM Read Latch Delay 1.5ns.
0.5ns	Set DRAM Read Latch Delay 0.5ns.
No delay	Set DRAM Read Latch No delay.

- **Memory Data Drive**

6 mA	Set Memory Data Drive 6 mA.
8 mA	Set Memory Data Drive 8 mA. <b>(Default Value)</b>

- **SDRAM Command Drive**

16 mA	Set SDRAM Command Drive 16 mA.
24 mA	Set SDRAM Command Drive 24 mA. <b>(Default Value)</b>

- **Memory Address Drive**

16 mA	Set Memory Address Drive 16 mA.
24 mA	Set Memory Address Drive 24 mA. <b>(Default Value)</b>

- **CAS# Drive**

8 mA	Set CAS# Drive 8 mA.
12 mA	Set CAS# Drive 12 mA. <b>(Default Value)</b>

- **RAS# Drive**

16 mA	Set RAS# Drive 16 mA.
24 mA	Set RAS# Drive 24 mA. <b>(Default Value)</b>

## Power Management Setup

AMIBIOS SETUP – POWER MANAGEMENT SETUP ( C ) 1999 American Megatrends, Inc. All Rights Reserved			
ACPI Sleep Type	S1/POS	RTC Alarm Date	Every Day

Resume On RTC Alarm	Disabled	F7 : Load SETUP Defaults	

Figure 5: Power Management Setup

- **ACPI Sleep Type**

S1/POS	Set ACPI sleep type to S1. <b>(Default Value)</b>
S3/STR	Set ACPI sleep type to S3.

- **USB Dev Wakeup from S3-S5**

Enabled	Enable USB Dev Wakeup from S3-S5.
Disabled	Disable USB Dev Wakeup from S3-S5. <b>(Default Value)</b>

- **Suspend Time Out (Minute.)**

Disabled	Disable Suspend Time Out Function. <b>(Default Value)</b>
1	Enable Suspend Time Out after 1min.
2	Enable Suspend Time Out after 2min.
4	Enable Suspend Time Out after 4min.
8	Enable Suspend Time Out after 8min.
10	Enable Suspend Time Out after 10min.
20	Enable Suspend Time Out after 20min.
30	Enable Suspend Time Out after 30min.
40	Enable Suspend Time Out after 40min.

50	Enable Suspend Time Out after 50min.
60	Enable Suspend Time Out after 60min.

- **Display Activity**

Ignore	Ignore Display Activity. <b>(Default Value)</b>
Monitor	Monitor Display Activity.

- **IRQ 3-IRQ15**

Ignore	Ignore IRQ3 -IRQ15.
Monitor	Monitor IRQ3-IRQ15.

- **Soft-off by Power Button**

Instant-off	The user press the power button once, he can turn off the system. <b>(Default Value)</b>
Delay 4 sec	Press power button 4 sec to Power off. Enter suspend if button is pressed less than 4 sec.

- **System after AC Back**

Memory	When AC-power back to the system, the system will return to the Last state before AC-power off.
Soft-Off	When AC-power back to the system, the system will be in "Off" state. <b>(Default Value)</b>
Full-On	When AC-power back to the system, the system will be in "On" state.

- **Modem USE IRQ**

3, 4, <b>(Default Value)</b> 5, 7, N/A
--

- **Resume On Ring / LAN**

Disabled	Disable Resume On Ring / LAN.
Enabled	Enable Resume On Ring / LAN. <b>(Default Value)</b>

- **PME Event Wake Up**

Disabled	Disable PME Event Wake Up.
Enabled	Enable PME Event Wake Up. <b>(Default Value)</b>

- **Resume On RTC Alarm**

You can set "Resume On RTC Alarm" item to enabled and key in Data/time to power on system.

Disabled	Disable this function. <b>(Default Value)</b>
Enabled	Enable alarm function to POWER ON system.

If the "Resume On RTC Alarm" is Enabled.

RTC Alarm Date:	Every Day, 1~31
RTC Alarm Hour:	0~23
RTC Alarm Minute:	0~59
RTC Alarm Second:	0~59

## PNP/PCI Configurations

AMIBIOS SETUP – PNP / PCI CONFIGURATION ( C ) 1999 American Megatrends, Inc. All Rights Reserved

		F7 : Load SETUP Defaults	

Figure 9: Integrated Peripherals

\*This items will be available when "Serial PortB Mode" is set to IrDA or ASK IR.

◆ These eight items will not be shown when there is sound chip onboard.

### ● OnBoard Serial Port A

Auto	BIOS will automatically setup the port A address. <b>(Default Value)</b>
3F8/COM1	Enable OnBoard Serial port A and address to 3F8.
2F8/COM2	Enable OnBoard Serial port A and address to 2F8.
3E8/COM3	Enable OnBoard Serial port A and address to 3E8.
2E8/COM4	Enable OnBoard Serial port A and address to 2E8.
Disabled	Disable OnBoard Serial port A.

### ● OnBoard Serial Port B

Auto	BIOS will automatically setup the port B address. <b>(Default Value)</b>
3F8/COM1	Enable OnBoard Serial port B and address to 3F8.
2F8/COM2	Enable OnBoard Serial port B and address to 2F8.
3E8/COM3	Enable OnBoard Serial port B and address to 3E8.
2E8/COM4	Enable OnBoard Serial port B and address to 2E8.
Disabled	Disable OnBoard Serial port B.

- Serial Port B Mode

Normal	Normal operation. <b>(Default Value)</b>
IrDA	Onboard I/O chip supports IRDA
ASK IR	Onboard I/O chip supports ASK IR.

- Duplex Mode

Half Duplex	IR Function Duplex Half.
N/A	Disable this function. <b>(Default Value)</b>
Full Duplex	IR Function Duplex Full.

- OnBoard Parallel port

378	Enable OnBoard LPT port and address to 378.
278	Enable OnBoard LPT port and address to 278.
3BC	Enable OnBoard LPT port and address to 3BC.
Auto	Set OnBoard LPT port to Auto. <b>(Default Value)</b>
Disabled	Disable OnBoard LPT port.

- Parallel Port Mode

EPP	Using Parallel port as Enhanced Parallel Port.
ECP	Using Parallel port as Extended Capabilities Port. <b>(Default Value)</b>
Normal	Normal Operation.
EPP+ECP	Using Parallel port as Enhanced Parallel Port & Extended Capabilities Port.

- Parallel Port DMA

Auto	Set Auto to parallel port mode DMA Channel. <b>(Default Value)</b>
3	Set Parallel Port DMA to 3.
1	Set Parallel Port DMA to 1.
0	Set Parallel Port DMA to 0.

- Parallel Port IRQ

7	Set Parallel Port IRQ to 7.
Auto	Set Auto to parallel Port IRQ DMA Channel. <b>(Default Value)</b>
5	Set Parallel Port IRQ to 5.

- **AC97 Audio**

Auto	Enable On Board AC'97 Audio. <b>(Default Value)</b>
Disabled	Disable On Board AC'97 Audio.

- **MC97 Modem**

Auto	Enable On Board MC'97 Modem. <b>(Default Value)</b>
Disabled	Disable On Board MC'97 Modem.

- **OnBoard Legacy Audio**

Enabled	Enable OnBoard Legacy Audio. <b>(Default Value)</b>
Disabled	Disable OnBoard Legacy Audio.

- **Sound Blaster**

Enabled	Enable Sound Blaster.
Disabled	Disable Sound Blaster. <b>(Default Value)</b>

- **SB I/O Base Address**

220h-22Fh	Set SB I/O Base Address to 220h-22Fh. <b>(Default Value)</b>
280h-28Fh	Set SB I/O Base Address to 280h-28Fh.
260h-26Fh	Set SB I/O Base Address to 260h-26Fh.
240h-24Fh	Set SB I/O Base Address to 240h-24Fh.

- **SB IRQ Select**

IRQ 5 / 7 / 9 / 10. <b>(Default Value: 5)</b>
---

- **SB DMA Select**

DMA 0 / 1 / 2 / 3. <b>(Default Value: 1)</b>
--

- **MPU-401**

Enabled	Enable MPU-401.
Disabled	Disable MPU-401. <b>(Default Value)</b>

**Ps. When Force Feedback joystick is used, MPU-401 needs to be Enable.**

---

- **MPU-401 I/O Address**

330h-333h	Set MPU-401 I/O Address to 330h-333h. <b>(Default Value)</b>
300h-303h	Set MPU-401 I/O Address to 300h-303h.
310h-313h	Set MPU-401 I/O Address to 310h-313h.
320h-323h	Set MPU-401 I/O Address to 320h-323h.

- **Game Port (200h-207h)**

Disabled	Disable Game Port (200h-207h).
Enabled	Enable Game Port (200h-207h). <b>(Default Value)</b>

## Hardware Monitor

AMIBIOS SETUP – HARDWARE MONITOR SETUP	
( C ) 1999 American Megatrends, Inc. All Rights Reserved	
ACPI Shut Down Temp.	Disabled
CPU Temperature	32°C/89°F
System Temperature	32°C/89°F
CPU Fan Speed	7123 RPM
System Fan Speed	0 RPM
Vcore	1.76 V
Vdd	3.33 V
Vcc3	3.27 V
+5.000V	4.97 V
+12.000V	12.18 V
ESC: Quit                    ↑↓→ ←: Select Item F1 : Help                    PU/PD+/-/: Modify F5 :Old Values (Shift)F2:Color F6 : Load BIOS Defaults F7 : Load Setup Defaults	

Figure 10: Hardware Monitor

- **ACPI Shutdown Temp. (°C / °F)**

(This function will be effective only for the operating systems that support ACPI Function.)

Disabled	Disable ACPI Shutdown function. <b>(Default Value)</b>
60°C / 140°F	Monitor CPU Temp. at 60°C / 140°F, if Temp. > 60°C / 140°F system will automatically power off.
70°C / 158°F	Monitor CPU Temp. at 70°C / 158°F, if Temp. > 70°C / 158°F system will automatically power off.
80°C / 176°F	Monitor CPU Temp. at 80°C / 176°F, if Temp. > 80°C / 176°F system will automatically power off.
90°C / 194°F	Monitor CPU Temp. at 90°C / 194°F, if Temp. > 90°C / 194°F system will automatically power off.

- **CPU Temperature (°C / °F)**

Detect CPU Temperature automatically.

- **System Temperature (°C / °F)**

Detect System Temperature automatically.

- **CPU Fan Speed**

Detect CPU Fan speed status automatically.

- **System Fan Speed**

Detect System Fan speed status automatically.

- **Current Voltage (V) Vcore / Vdd / Vcc3 / +5V / +12V**

Detect system's voltage status automatically.

## Set Supervisor / User Password

When you select this function, the following message will appear at the center of the screen to assist you in creating a password.

AMIBIOS SIMPLE SETUP UTILITY-VERSION 1.24a ( C ) 1999 American Megatrends, Inc. All Rights Reserved	
STANDARD CMOS SETUP	INTEGRATED PERIPHERALS
BIOS FEATURES SETUP	HARDWARE MONITOR SETUP
CHIPSET FEATURES SETUP	SUPERVISOR PASSWORD
POWER MANAGEMENT SETUP	USER PASSWORD
PNP/PCI CONFIGUR	ON
LOAD BIOS DEFAULTS	SAVE & EXIT SETUP
LOAD SETUP DEFAULTS	EXIT WITHOUT SAVING
ESC : Quit    ↑↓→← : Select Item    (Shift) F2 : Change Color    F5 : Old Values F6 : Load BIOS Defaults    F7 : Load Setup Defaults    F10: Save & Exit	
Enter new supervisor password:	
Chang /Set /Disabled Password	

Figure 11: Password Setting

Type the password, up to six characters, and press <Enter>. You will be asked to confirm the password. Type the password again and press <Enter>. You may also press <Esc> to abort the selection and not enter a password.

To disable password, just press <Enter> when you are prompted to enter password. A message **"PASSWORD DISABLED"** will appear to confirm the password being disable. Once the password is disable, the system will boot and you can enter Setup freely.

The BIOS Setup program allows you to specify two separate passwords: a **SUPERVISOR PASSWORD** and a **USER PASSWORD**. When disable, anyone may access all BIOS Setup program function. When enable, the Supervisor password is required for entering the BIOS Setup program and having full configuration fields, the User password is required to access only basic items.

If you select **"Always"** at **"Password Check"** in BIOS Features Setup Menu, you will be prompted for the password every time the system is rebooted or any time you try to enter Setup Menu.

If you select **"Setup"** at **"Password Check"** in BIOS Features Setup Menu, you will be prompted only when you try to enter Setup.

## IDE HDD AUTO Detection

AMIBIOS SETUP – STANDARD CMOS SETUP ( C ) 1999 American Megatrends, Inc. All Rights Reserved							
Date (mm/dd/yyyy) : Wed Jan 17, 2001							
Time (hh/mm/ss) : 10:36:24							
	TYPE	SIZE	CYLS	HEAD	PRECOMP	LANDZ	SECTOR MODE
Pri Master : Not Installed							
Pri Slave : Not Installed							
Sec Master : Not Installed							
Sec Slave : Not Installed							
Floppy Drive A: 1.44 MB 3 ½				Base Memory : 640 Kb			
Floppy Drive B: Not Installed				Other Memory: 384 Kb			
Boot Sector Virus Protection: Disabled				Extended Memory: 127Mb			
				Total Memory: 128Mb			
Month: Jan – Dec				ESC : Exit			
Day: 01 – 31				↑↓ : Select Item			
Year: 1990– 2099				PU/PD/+/- : Modify			
				(Shift)F2 : Color			

Figure 12: IDE HDD Auto Detection

Type "Y" will accept the H.D.D. parameter reported by BIOS.

Type "N" will keep the old H.D.D. parameter setup. If the hard disk cylinder number is over 1024, then the user can select LBA mode or LARGER mode for DOS partition larger than 528 MB.

## Save & Exit Setup

Figure 13: Save & Exit Setup

Type "Y" will quit the Setup Utility and save the user setup value to RTC CMOS.

Type "N" will return to Setup Utility.

## Exit Without Saving

Figure 14: Exit Without Saving

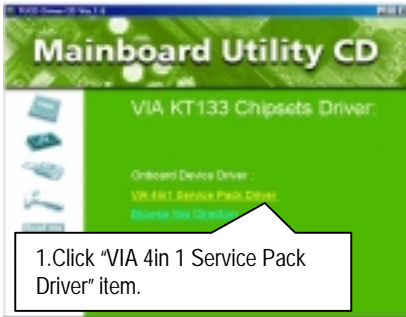

Type "Y" will quit the Setup Utility without saving to RTC CMOS.

Type "N" will return to Setup Utility.

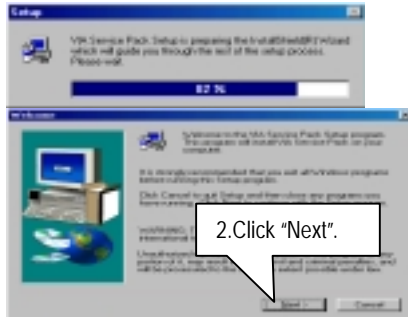

# Appendix

## Appendix A: VIA KT133 Chipsets Driver Installation

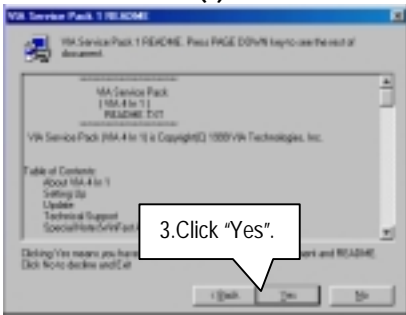

Insert the support CD that came with your motherboard into your CD-ROM driver or double-click the CD driver icon in My Computer to bring up the screen.

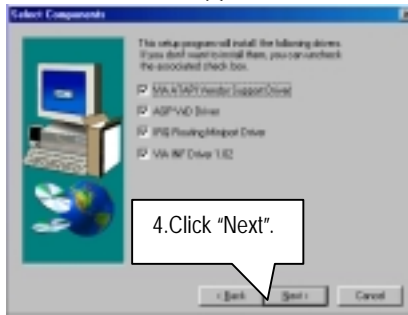

(1)

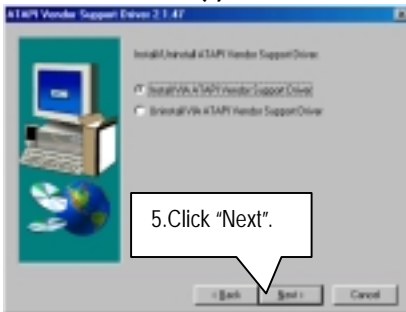

(2)

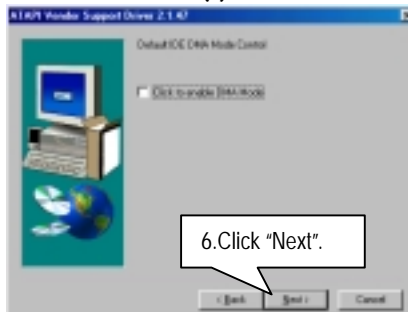

(3)

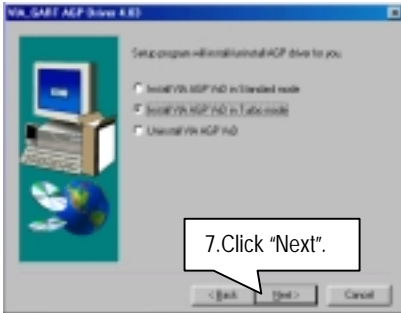

(4)

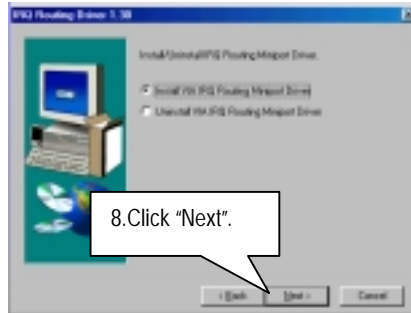

(5)

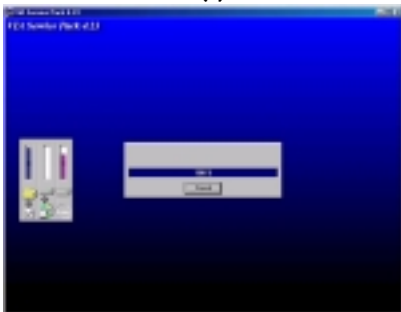

(6)

(7)

(8)

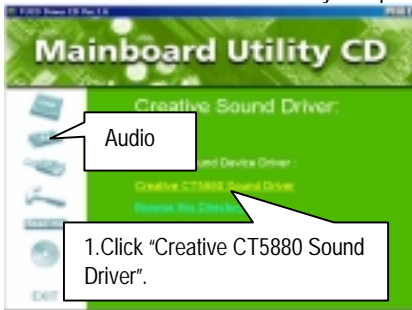

(9)

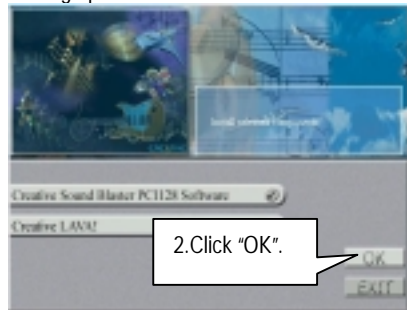

(10)

## Appendix B: Creative Sound Driver Installation (Optional)

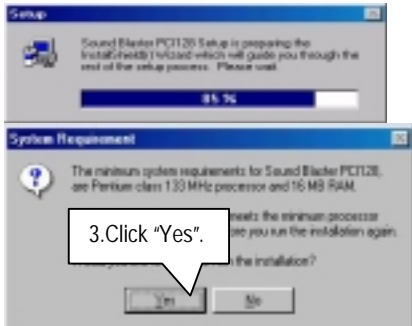

Insert the support CD that came with your motherboard into your CD-ROM driver or double-click the CD driver icon in My Computer to bring up the screen.

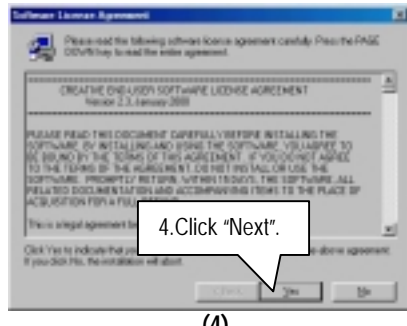

(1)

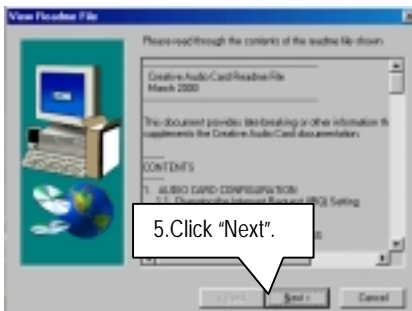

(2)

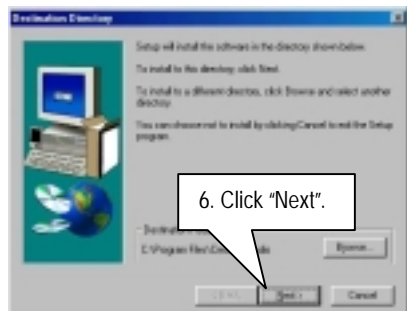

(3)

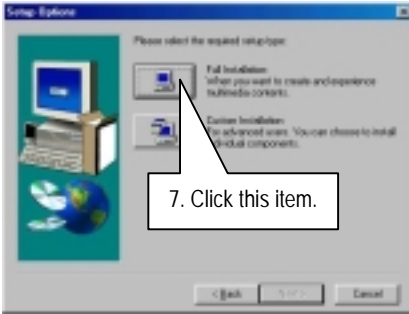

(4)

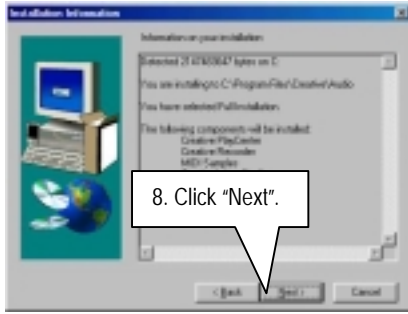

(5)

(6)

(7)

(8)

(10)

## Appendix C: VIA AC'97 Audio Driver

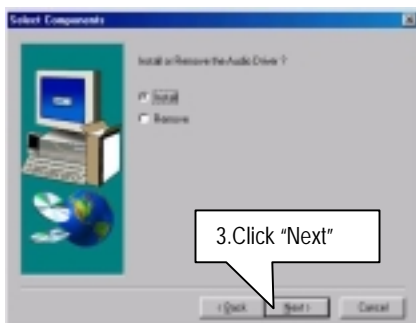

Insert the support CD that came with your motherboard into your CD-ROM driver or double-click the CD driver icon in My Computer to bring up the screen.

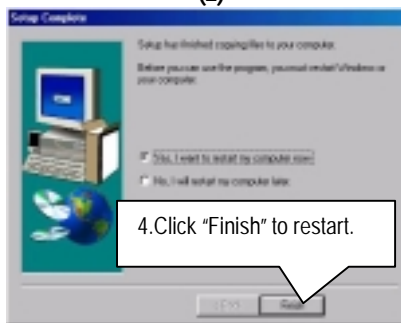

(1)

(2)

(3)

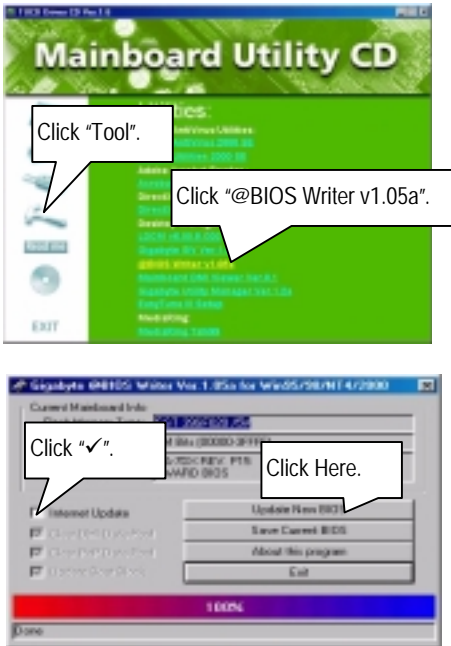

(4)

## Appendix D: BIOS Flash Procedure

BIOS update procedure:

If your OS is Win9X, we recommend that you used Gigabyte @BIOS Program to flash BIOS.

Methods and steps:

### I. Update BIOS through Internet

- a. Click "Internet Update" icon
- b. Click "Update New BIOS" icon
- c. Select @BIOS sever ( "Gigabyte @BIOS sever 1 in Taiwan" and "Gigabyte @BIOS sever 2 in Taiwan" are available for now, the others will be completed soon)
- d. Select the exact model name on your motherboard
- e. System will automatically download and update the BIOS.

### II. Update BIOS **NOT** through Internet:

- a. **Do not** click "Internet Update" icon
- b. Click "Update New BIOS"
- c. Please select "All Files" in dialog box while opening the old file.
- d. Please search for BIOS unzip file, downloading from internet or any other methods (such as: 7ZX.F1).
- e. Complete update process following the instruction.

### III. Save BIOS

In the very beginning, there is "Save Current BIOS" icon shown in dialog box. It means to save the current BIOS version.

### IV. Check out supported motherboard and Flash ROM:

In the very beginning, there is "About this program" icon shown in dialog box. It can help you check out which kind of motherboard and which brand of Flash ROM are supported.

#### Note:

- a. In method I, if it shows two or more motherboard's model names to be selected, please make sure your motherboard's model name again. Selecting name will cause the system unbooted.
- b. In method II, be sure that motherboard's model name in BIOS unzip file are the same as your motherboard's. Otherwise, your system won't boot.
- c. In method I, if the BIOS file you need cannot be found in @BIOS server, please go onto Gigabyte's web site for downloading and updating it according to method II.
- d. Please note that any intercorruption during updating will cause system unbooted

---

Or else you can select flash BIOS in DOS mode.

● Please check your **BIOS vendor (AMI or AWARD)**, your **motherboard name** and **PCB version** on the motherboard.

1. Format a bootable system floppy diskette by the command "**format a:/s**" in command mode.
2. Visit the Gigabyte website at [http:// www.gigabyte.com.tw](http://www.gigabyte.com.tw) , Select the BIOS file you need and download it to your bootable floppy diskette.
3. Insert the bootable diskette containing the BIOS file into the floppy diskette driver.
4. Assuming that the floppy diskette driver is A, reboot the system by using the A: driver. At the A: > prompt, run the BIOS upgraded file by executing the Flash BIOS utility and the BIOS file with its appropriate extension.

Example: *(AMI tool) (Where 7zx.f1 is name of the BIOS file name)*

A:>flashxxx.exe 7zx.f1 ←↵

Example: *(Award tool) (Where 7zx.f1 is name of the BIOS file name)*

A:>Awdflash.exe 7zx.f1 ←↵

5. Upon pressing the <Enter> key, a flash memory writer menu will appear on screen. Enter the new BIOS file name with its extension filename into the text box after file name to program.
6. If you want to save the old BIOS file(perform as soon as system is operational, this is recommended), select Y to **DO YOU WANT TO SAVE BIOS**, then type the old BIOS filename and the extension after filename to save: This option allows you to copy the contents of the flash memory chip onto a diskette, giving you a backup copy of the original motherboard BIOS in case you need to re-install it. Select N to **DO YOU WANT TO SAVE BIOS**, if you don't want to save the old BIOS file.
7. After the decision to save the old BIOS file or not is made, select Y to **ARE YOU SURE TO PROGRAM** when the next menu appear; wait until a message showing Power Off or Reset the system appears. Then turn off your system.
8. Remove the diskette and restart your system.
9. Hold down <Delete> key to enter BIOS setup. You must select "Load Setup BIOS Default" to activate the new BIOS, then you may set other item from the main menu.

## Appendix E: Acronyms

Acronyms	Meaning
ACPI	Advanced Configuration and Power Interface
APM	Advanced Power Management
AGP	Accelerated Graphics Port
AMR	Audio Modem Riser
ACR	Advanced Communications Riser
BIOS	Basic Input / Output System
CPU	Central Processing Unit
CMOS	Complementary Metal Oxide Semiconductor
CRIMM	Continuity RIMM
CNR	Communication and Networking Riser
DMA	Direct Memory Access
DMI	Desktop Management Interface
DIMM	Dual Inline Memory Module
DRM	Dual Retention Mechanism
DRAM	Dynamic Random Access Memory
DDR	Double Data Rate
ECP	Extended Capabilities Port
ESCD	Extended System Configuration Data
ECC	Error Checking and Correcting
EMC	Electromagnetic Compatibility
EPP	Enhanced Parallel Port
ESD	Electrostatic Discharge
FDD	Floppy Disk Device
FSB	Front Side Bus
HDD	Hard Disk Device
IDE	Integrated Dual Channel Enhanced
I/O	Interrupt Request
I/O	Input / Output
IOAPIC	Input Output Advanced Programmable Input Controller
ISA	Industry Standard Architecture
LAN	Local Area Network
LBA	Logical Block Addressing
LED	Light Emitting Diode
MHz	Megahertz
MIDI	Musical Interface Digital Interface
MTH	Memory Translator Hub
MPT	Memory Protocol Translator
NIC	Network Interface Card
OS	Operating System

To be continued...

---

Acronyms	Meaning
OEM	Original Equipment Manufacturer
PAC	PCI A.G.P. Controller
POST	Power-On Self Test
PCI	Peripheral Component Interconnect
RIMM	Rambus in-line Memory Module
SCI	Special Circumstance Instructions
SECC	Single Edge Contact Cartridge
SRAM	Static Random Access Memory
SMP	Symmetric Multi-Processing
SMI	System Management Interrupt
USB	Universal Serial Bus
VID	Voltage ID
