
D-Bracket™ Connector -- J11 (Optional)

B

If your motherboard comes with J11 connector, you can connect a D-Bracket™ to J11. D-Bracket™ is a USB Front Panel Bracket integrating four LEDs whose functions are similar to D-LED™ and allows users to identify system problem through 16 various combinations of LED signals. For definitions of 16 signal combinations, refer to page 1-11 *D-LED™*.
