

**XtGetDisplays** – retrieve a list of displays associated with an application context

```
void XtGetDisplays(app_context, dpy_return, num_dpy_return)  
    XtAppContext app_context;  
    Display*** dpy_return;  
    Cardinal* num_dpy_return;
```

*app\_context* Specifies the application context.

*dpy\_return* Returns a list of open X display connections in the specified application context.

*num\_dpy\_return* Returns the count of open X display connections in *dpy\_return*.

**To free the list of displays, use XtFree.**
