It's not just that the COMPAQ DESKPRO is a best-seller...

It's why.

In four months the COMPAQ DESKPRO® became the world's second-best-selling 16-bit personal business computer.

The modular COMPAQ DESKPRO expands from entry level to advanced computing, with up to 30 Megabytes of fixed disk storage. Select the exact features you need, including tape back-up. In fact, you can have up to four *internal* storage devices (the IBM® PC or IBM PC/XT™ can have only two).

Interfaces for a parallel printer, RGB color and video composite monitors, and RF modulator are built in. So you don't use up expansion slots for them. On other computers you probably would.

You also get uncompromising compatibility with the most popular peripherals and with thousands of the most popular business programs. And the COMPAQ DESKPRO runs programs two to three times *faster* than either the IBM PC or IBM PC/XT.

The COMPAQ DESKPRO even comes with a better monitor.

You get high-resolution text *and* graphics on one screen, saving the cost of a second monitor.

The COMPAQ DESKPRO continues to be a best-seller because it simply works better.

1. For entry-level computing start with one diskette drive and 128K RAM.

2. Add a second diskette drive when the work load calls for it.

3. If your files get larger, add a 10-Mbyte fixed disk drive.

4. Getting new memory-hungry software? Upgrade to 640K RAM.

5. Monster spreadsheets are no problem. Add an 8087-2 math co-processor.

6. Protect reams of data on a pocket-sized tape cartridge by adding a tape back-up.

COMPAQ®

It simply works better.
