**COMPAQ**<sup>®</sup>

It simply works better.

# The smart choice for basic industry-standard

*The COMPAQ DESKPRO won the highest overall performance score within its category in Software Digest's 1986 comparative testing.*

Compaq makes desktop computers as respected as their world-celebrated portables, from the most basic to the most advanced in the world. Our first desktop computer, the COMPAQ DESKPRO<sup>®</sup>, has consistently received unmatched user satisfaction ratings and awards in its category. Its 8086 technology gives it a performance level that, when combined with its extremely versatile design, adds to its value and *your* productivity.

## The grand design

The COMPAQ DESKPRO was designed with plenty of storage options. In fact, it's expandable to four separate internal storage devices from 5<sup>1</sup>/<sub>4</sub>-inch 360-Kbyte diskette drives to an optional 20-megabyte fixed disk drive. This gives you the opportunity to add more storage as you need it. You can also protect your data with a feature first introduced by Compaq—the optional 10-megabyte internal fixed disk drive backup, which records data on convenient tape cartridges.

## A worthy performance

The COMPAQ DESKPRO represents an affordable high-performance solution for users with entry-level needs. It actually runs thousands of major software and hardware products 2-3 times faster than industry-standard 8088-based computers. Not only is it exceptionally compatible, the COMPAQ DESKPRO is also connectable. It can easily communicate with mainframes or minicomputers. And it can exchange data with other personal computers.

# desktop computing needs

## More to look at

With the optional COMPAQ Dual-Mode Monitor, high-resolution text and graphics are available on one screen, in either amber or green display, eliminating the expense of a separate monitor. If your work demands color, the COMPAQ Color Monitor is another option to look at. It works with the COMPAQ Enhanced Color Graphics Board to display 16 colors at once from a palette of 64. Compaq gives you a choice between two excellent high-resolution monitors. So you're covered no matter what your needs are.

## Quality craftsmanship

The COMPAQ DESKPRO offers users the potential for more productivity with better features and more performance than any other basic desktop computer in its class. Plus you get the extras that Compaq has become famous for, such as optional tape backup protection, the standard 101-key COMPAQ Enhanced Keyboard and more. It clearly is the ideal combination of desktop computing capabilities for today's value-conscious personal computer user.

## Service worldwide

The Compaq network of Authorized Dealers spans the globe. Whether you're a professional on the move, or an international corporation with branch offices in dozens of states and countries, you'll find strong service and support readily available.

## Specifications

**Processor:** 16-bit 8086; 7.14- or 4.77-MHz clock speed; red/green LED to distinguish selected operating speed; 8087-2 coprocessor socket.

**Compatibility:** Runs the most popular software and hardware products designed for industry-standard PC's.

**Expansion Slots:** 7 slots available.

**Memory:** 256 Kbytes of RAM, expandable to 640 Kbytes on the main system board.

**Storage Devices:** Two 5<sup>1</sup>/<sub>4</sub>-inch 360-Kbyte Half-Height Diskette Drives standard; optional 20-Megabyte Half-Height Fixed Disk Drive; optional internal 10-Megabyte Half-Height Fixed Disk Drive Tape Backup.

**Interfaces:** Parallel printer interface standard.

**Keyboard:** COMPAQ Enhanced Keyboard; includes 12 function keys, separate numeric and cursor control keypads and LED indicators on CAPS LOCK, NUM LOCK and SCROLL LOCK keys.

**Display Options:** 13-inch diagonal COMPAQ Color Monitor; 12-inch diagonal green or amber Dual-Mode Monitor; COMPAQ Enhanced Color Graphics Board; COMPAQ Video Display Controller Board.

**Other Options:** MS-DOS<sup>®</sup>/BASIC Version 2 or Version 3 diskettes and reference guides; 512-Kbyte Memory Upgrade Kit; Asynchronous Communications/Clock Board; Asynchronous Communications/Parallel Printer Board; COMPAQ Enhanced Color Graphics Board Technical Reference Guide; 10-megabyte tape cartridges.

**Physical Specifications:** System unit-19.8" W × 6.4" H × 16.5" D; 50.3cm W × 16.3cm H × 41.9cm D; enhanced keyboard-19.25" W × 1.5" H × 8.3" D; 48.9cm W × 3.8cm H × 21.1cm D; dual-mode monitor-14.75" W × 10.25" H × 13.75" D; 37.5cm W × 26.0cm H × 34.9cm D; color monitor-13.93" W × 11.83" H × 14.96" D; 35.4cm W × 30.0cm H × 38.0cm D.

## Standard Configuration

**COMPAQ DESKPRO:** 256 Kbytes of random-access memory (RAM); two 5<sup>1</sup>/<sub>4</sub>-inch 360-Kbyte diskette drives; seven 8-bit expansion slots available.
