

October 16, 1989 -- Compaq Computer Corporation (NYSE: CPQ) today introduced the 12 MHz 80C286-based COMPAQ LTE/286 and 9.54 MHz 80C86-based COMPAQ LTE, the first 8 1/2 by 11 inch computers to offer full PC functionality. Weighing only 6 pounds with battery and measuring less than 2 inches high, they offer more than 3 1/2 hours of battery operation. These systems provide: a 3 1/2-inch, 1.44-megabyte diskette drive; a high-speed 40- or 20-megabyte fixed disk drive; an 80-key keyboard with 101-key compatibility; and an optional 2400-baud modem.
